

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## OSSIAM US STEEPENER

(2C (USD) ISIN: LU1991353761) a sub-fund of OSSIAM LUX SICAV

Management Company: Ossiam, part of the Natixis group of companies

### Objectives and Investment Policy

#### Investment objective:

The investment objective of the OSSIAM US STEEPENER (the "Fund") is to replicate, before the Fund's fees and expenses, the performance of the Solactive US Treasury Yield Curve Steepener 2-5 vs 10-30 Index closing level. The Fund is passively-managed.

The Solactive US Treasury Yield Curve Steepener 2-5 vs 10-30 Index (the "Index") is a leveraged index which is expressed in USD, created by Solactive (the "Index Provider"), and calculated and published by Solactive. For a detailed description of the Index, see section "Description of the Index" and "Additional information on the leverage policy"

The Index is invested in futures on US Treasury bonds and is designed to benefit from an increase in the USD interest rate slope, measured as the difference between long term and short-term rates, while limiting sensitivity to a parallel shift of the yield curve by targeting a duration neutral exposure to USD interest rates. The Index will reach this objective by buying short term US Treasury futures and selling long term US Treasury futures. The Index composition will be reconstituted on a quarterly basis. For a detailed description of the Index, see section "Description of the Index" in the relevant Fund Appendix of the Prospectus.

#### Investment policy:

##### Until 19th of May 2020

In order to achieve its investment objective, the Fund will primarily invest, through physical replication, in all or part of the components comprised in the Index and in substantially the same weights as in the Index.

Alternatively, the Fund may with due regard to the best interest of its Shareholders use swaps with the objective of tracking the Index performance through synthetic replication. In that case, the Fund will invest in a portfolio of assets, the performance or the value of which will be exchanged against the performance or the value of the Index or a related index, or a portfolio of its constituents through swap agreements with a swap counterparty. This method implies a counterparty risk as described in the below Risk and Reward Profile. The net asset value per share of the Fund will therefore increase (or decrease) according to the evolution of the Index. The counterparty to the swaps will be a first class financial institution that specializes in this type of transaction. The Fund may also enter into multiple swap agreements with multiple swap counterparties with the same characteristics as previously described.

In case of synthetic replication, an index license contract may exist between the swap counterparty (ies) and the index provider; therefore, licensing fees may be included in the swap costs.

The Fund may, with due regard to the best interest of its Shareholders, decide to switch partially or totally from one of the above described policies to the other (i.e. synthetic replication vs. physical replication).

In both replication strategies, the Fund shall be permanently invested in bonds denominated in USD which are issued either by companies or the US government. The bonds issued by companies will have a remaining maturity below 3 years and have minimum rating of BBB- by Standard & Poor's or Baa3 by Moody's (equivalent Investment Grade).

In addition and on an ancillary basis, the Fund may invest in money market instruments or use other derivatives for hedging and investment purposes and enter into securities lending and borrowing transactions as well as repurchase agreement transactions, as described under "Use of Derivatives, Special Investment and Hedging Techniques" in the Prospectus.

The Reference Currency of the Fund is the US Dollar.

#### Additional information on the leverage policy:

The Fund is exposed to leverage at the level of the Index which embeds leverage in its methodology. The commitment approach is used to calculate the Fund's global exposure (as mentioned below in the Section "Risk and Reward Profile"). The Fund does not bear any costs in relation to leverage. The Fund's performance will not differ significantly from the multiple of the Index performance over the medium to long term.

The UCITS ETF 1C (USD) shares are listed for trading on one or more stock exchanges and investors may buy or sell Shares through their usual broker on any trading day of the relevant stock exchange(s) which is also a Dealing Day in Luxembourg or, through a fund platform. Please contact your broker for additional information. The UCITS ETF 1C (USD) Share Class is an accumulating Share Class therefore income derived from the Fund is reinvested. Please refer to the section entitled "Subscription, Transfer, Conversion and Redemption of shares" and the section entitled "Practical information" of the Fund appendix in the Prospectus for additional information.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within less than 3 years.

### Risk and Reward Profile

The Fund is ranked 3 on the synthetic risk and reward indicator scale, which is based on historical data. Due to its exposure to fixed income markets, the Fund may experience medium volatility, as expressed by its rank on the above scale. Historical data may not be a reliable indication for the future. The risk category shown is not guaranteed and may shift over time. There is no capital guarantee or protection on the value of the Fund. The lowest category does not mean "risk free".

#### Special Risk Considerations

**Index Risk:** The value of the Fund's Shares is linked to the Index, the value of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that the underlying methodology of the Index will indeed result in a return above any comparable investment strategy or that they will recover their initial investment.

**Credit risk:** By investing in debt securities issued by a corporate, bank or sovereign organization the Fund may be exposed to the possibility that this issuer will not be able to reimburse debt holders (principal and interest payment).

**Derivative and counterparty risk:** As a result of entering into swap(s) transaction(s), the Fund is subject to potential counterparty and issuer risk. In the event of insolvency or default of the counterparty or issuer, the Fund could suffer a loss. The value of the swap(s) transaction(s) may vary according to several factors such as (but not limited to) the level of the Index, the level of interest rates and the liquidity of the bond market.

**Geographic Concentration risk:** Fund that concentrates investments in certain geographic regions may suffer losses, particularly when the economies of those regions experience difficulties or when investing in those regions become less attractive. Moreover, the markets in which the Fund invests may be significantly affected by adverse political, economic or regulatory developments.

**Leverage risk:** The Index is a leveraged index. Leveraged products amplify both gains and losses by a given leverage factor. Losses may therefore potentially be substantial.

Please refer to the section entitled "General risk considerations" of the Prospectus for additional details on risks.

## Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### Charges by Share Class-Share Class 2C (USD)

#### One-Off charges taken before or after you invest

Entry Charge	Maximum Sales Charge 3.00%
	Maximum Charge payable to the Fund for Subscriptions 1.00%
Exit Charge*	Maximum Redemption Charge 3.00%
	Maximum Charge for Redemptions payable to the Fund 1.00%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

#### Charges taken from the Fund over a year

Ongoing Charges:	0.32% p.a.
------------------	------------

#### Charges taken from the Fund under certain specific conditions

Performance Fee:	None
------------------	------

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser.

\* An additional levy up to 2.00% may be applied to an investor engaging in excessive trading or market timing practices.

The ongoing charges figure is based on estimated expenses. This figure may vary from year to year. It excludes the portfolio transaction costs, except in the case of an entry/exit charge paid by the SICAV when buying or selling units in another collective investment undertaking.

For more information about charges, please refer to chapters “Charges and Expenses” and “Subscription, transfer, conversion and redemption of shares” of the Fund’s Prospectus, which is available at [www.ossiam.com](http://www.ossiam.com).
